

Add event

```
graph TD; A([Add event]) --> B[Search free space]; B -- i --> C[gen[i] += 1]; B -- no found --> D[h = INVALID]; C --> E[h = gen[i] << 8 | i];
```

The flowchart starts with an oval node 'Add event' pointing to a blue rectangular node 'Search free space'. From 'Search free space', there are two paths: one labeled 'i' leading to a blue rectangular node 'gen[i] += 1', and another labeled 'no found' leading to a red rectangular node 'h = INVALID'. From 'gen[i] += 1', an arrow leads to a green rectangular node 'h = gen[i] << 8 | i'.

Search free space

i

no found

$\text{gen}[i] += 1$

$h = \text{gen}[i] \ll 8 \mid i$

$h = \text{INVALID}$
